

Installation instructions

Terralink Data eXchange (TDX™) Service Pack 3 Version Compatibility 2-02-300

Note:

- * This service pack must be run wherever TDX™ was installed as either "Client with Local Files", "Standalone", or "Server".
- * Users will be required to provide log in credentials for Terralink™ Utility when Service Pack is run for "Server" or "Standalone" installations. Be prepared with your Data Source Name (DSN), and a valid TDX™ username and password.

To Install:

- 1) You must have local administrative privileges on the target computer (where this update will be installed).
- 2) All users must be out of the TDX™ application before installation (especially important if you use TDX™ network clients).
- 3) Click the "Start" link on the download page to begin downloading the TDX2-02-300SP3 update.
- 4) After the download is complete, double click on the file to start the install.
- 5) Click on the "Install" button to start, and log into Terralink™ Utility if required (see note above).

The program will end automatically when the installation is finished

Please note:

This update may take 5-10 minutes to complete. **Do not close the update window even if you receive a "not responding" message.**

Changes Included in This Update:

Release notes for TDX™ 2-02-300SP3

- Attachments - Bug, Permissions for attachments were tied incorrectly to inventory. The work around before SP3 was to grant inventory license and access to group.
- Attachments - Enhancement, added mass-export utility in "Our Attachments" folder.
- Attachments - Bug, Double clicking on a folder in list view doesn't open the folder. Works OK in navigation tree.
- Attachments - Enhancement, Added all tool functions to the menu in the Attach dialog window.
- DOT Window - Bug, Packing Group Tab did not display placards for some materials.
- LDR - Bug, New Universal Treatment Standards were not saved or included as UHC's when D-coded.
- Main Window - Bug, Icon size was not restored correctly from registry resulting in the user having to reset it every time logged in
- Manifest - Bug, Older style DOT Shipping names from profiles were corrupted when copied to a manifest.
- Manifest - Bug, Additional description, Special Handling, and DOT text fields in Line Item tab view would not clear when highlighted and deleted.
- Manifest - Bug, Form options, Profile hunt by number does not initialize correctly on newly opened manifest form.
- Manifest - Enhancement, made DOT drop down field wider and added label information.

- Profile - Bug, fixed tab issue in complex waste entry form that caused tab to go, incorrectly, to waste codes after entry.
- Profile - Bug, Labels do not always reflect waste type. I.E. sometimes a non-haz waste stream will select the haz label and vice versa.
- Reference - Update, DOT reference tables with the most current 2008 changes.
- Reference - Update, ERG book with the latest 2008 version which includes, ERG Guide book text, ERG Isolation Zone metrics for spills on land or water, ERG water reactive gas formulas, and Marine Pollutant flags.
- Reference - Update, Containers such as Pallet, Roll off, and Truck are incorrectly listed as a storage areas.
- Reports - Enhancement, added waste codes to Waste Stream Summary (Line Item Report).
- Select - Enhancement, added "Emergency Contact" attribute group to "Contact" search.
- Select - Enhancement, added "Phone" attribute to all contact attribute groups.
- Taxi - Bug, some subordinate objects were not included in the taxi file when exporting.
