

TDX™ Reporting

- **State Manifest Forms**

One of the key benefits of **TDX** can be expressed through the power and comprehensive nature of the **TDX Reporting** module.

- **Labels**

The day you install **TDX** you will notice all the manifests you need, with continuation sheets. Add the four major label companies and LDR reporting, either from manifests or profiles, and all the fundamentals are already in place.

- **LDR's**

Profiles are available for the major facilities in the U.S., and if there's one you need, take advantage of our special customization services to build a profile form especially tailored for your needs.

- **Facility Profiles**

The database and application design of **TDX** enables you to keep track of thousands of transactions, and, in many cases, years of complex data. To use the results of that, Terralink provides powerful inventory management reporting plus a myriad of other state and federal reports – all designed to help you keep track of where you are, and where you've been.

- **EPA Biennial**

So, if it's backward tracking of inventory, a state tax report, or inventory summary reports, you can rest assured that **TDX** is working as hard as possible to provide you all the tools necessary to improve productivity.

- **Tax and Fee Reports**

Add to all this the Terralink customization services for special reports. Then watch your **TDX** decision continue to give you the solution you need – from the start and going forward.

- **Management Summaries**

You have choices. We have answers. Go Further with Terralink.

- **Customized Reports**

Call **207-772-6500** today to see what **TDX** can do for you.
